

Applicant's To-Do List

Washington Wildlife and Recreation Program Farmland Preservation Program

This to-do list is designed to help you prepare and submit a grant application for the Washington Wildlife and Recreation Program's Farmland Preservation Program.

Grants may be used for the acquisition of development rights on farmlands in Washington to ensure the lands remain available for agricultural practices. Limited restoration is a secondary goal of the farmland program.

You must submit the information required through [PRISM Online](#), our online project data system. These steps will guide you through the Recreation and Conservation Office (RCO) application process.

Step 1: Applicant Establishes Eligibility

- Eligible Applicants: Cities, counties, nonprofit nature conservancy corporations or associations, and the Washington State Conservation Commission.
- If you are a first-time applicant, submit a legal opinion to establish eligibility.
- ALL projects must include acquisition of an agricultural easement or lease. Fee simple acquisition is not allowed in this category.
- Nonprofit, nature conservancy corporations or associations must meet the following eligibility requirements:
 - Be registered in the State of Washington as a nonprofit as defined by Revised Code of Washington 84.34.250.
 - Consistent with Revised Codes of Washington 24.03.220, 24.03.225, and 24.03.230, identify a successor organization fully qualified to ensure management continuity of any Washington Wildlife and Recreation Program grants received by the corporation or association.
 - Demonstrate at least 3 years' activity in managing projects relevant to the types of projects eligible for funding in the farmland preservation category. "Activity in managing projects" means the tasks necessary to manage an on-the-ground farmland project, such as negotiating for acquisition of property rights, closing on

an acquisition, developing and implementing management plans, designing and implementing projects, securing and managing the necessary funds regardless of fund source, and other tasks.

- All farmland category applicants must demonstrate the following:
 - The preservation of agricultural lands is a priority of the organization.
 - A proven ability to draft, acquire, monitor, and enforce conservation easements.

Step 2: Applicant Reviews Materials

Review the appropriate Recreation and Conservation Funding Board manuals for this grant category:

- [Manual 10f](#), *Washington Wildlife and Recreation Program, Farmland Preservation Program*
- [Manual 3](#), *Acquisition Projects*
- [Manual 5](#), *Restoration Projects*

Step 3: Applicant Submits an Application by May 2, 2016

PRISM Data Fields

PRISM will open in mid-February to start your application. To begin, go to [PRISM Online](#) to access the Application Wizard and select "Get Started/Start New Application." You then will be prompted to fill out several screens of information about your project. On-screen instructions, tool tips, and links are available as you navigate through PRISM.

PRISM Attachments

There is an "Attachments" screen in the PRISM Online application and you must attach the following documents before you may submit your application. Include the applicant name, project name, and RCO grant number on each attachment. Maps also must include a north arrow, scale, and labels for any major highways, roads, cities, water bodies, etc. If the project includes any combination of acquisition, development, or restoration, you must attach the documents required for all project types.

- ❑ [Authorizing Resolution/Application Authorization](#) shows the application is supported by the elected council or commission, board, or executives of your organization. You must adopt the text verbatim even if you choose to use your own format.

- ❑ **Landowner Acknowledgement Form.** You must demonstrate that the landowner is aware of your interest in purchasing his/her property. There are several options to meet this requirement (see Section 3: Application Requirements in *Manual 3, Acquisition Projects*).
- ❑ **Local Jurisdiction Review for Acquisition Projects.** You must give the county commission or city council with jurisdiction over the project area an opportunity to review the grant application. Attach documentation demonstrating that you have met this requirement (see Section 3: Application Requirements in *Manual 3, Acquisition Projects*). For applicants acquiring property within their own jurisdictions, the authorizing resolution meets this requirement for notice.
- ❑ **Map: Area of Potential Effect** (for projects with restoration components only) shows the geographic areas where a project may change directly or indirectly the character or use of historic properties or archaeological resources. The map must include a polygon of the entire project area and should show location-identifying features such as section, township, and range. For most projects a topographic base map is most appropriate, though in dense populated urban settings an aerial base map can be used.
- ❑ **Map: Parcel Map** Shows the parcels to be acquired in the scope of work as well as adjacent land ownership. Show the parcels in relation to local roadways, landmarks, etc.
- ❑ **Photograph.** Every application requires at least one general project photograph in .jpg format. A current ground shot or aerial view of the project site is appropriate.
- ❑ **Site Plan: Restoration Site Plan** (for combination acquisitions and restoration projects only) shows the restoration activities to take place on the project site. Existing and future restored areas should be distinguished from those in the proposed project scope.

Note that letters and other documented expressions of project support submitted with the application will be made available for advisory committee review. Applicants also may summarize this support in their presentations for technical review and evaluation.

Also note that except for a few protected items, such as cultural resources data or confidential appraisal documents, as soon as you start your application, it and most attachments will be available for review by RCO staff, evaluators, and the public.

Step 4: Technical Review – May 10-11, 2016

You will present your project to the advisory committee. Participation in this in-person technical review is not required but is highly recommended. It serves as a practice session for the upcoming evaluation and gives you valuable feedback. The focus of review is on eligibility and the technical aspects (scope, design, cost, feasibility, etc.) of your project.

- Prepare a PowerPoint presentation responding to the evaluation criteria in Manual 10f. Respond to the criteria in order. Note that handouts or other materials will not be permitted. See [Developing a PowerPoint Presentation for Grant Applications](#) for more information.
- RCO will schedule a time for you to make a presentation to the evaluation team.
- Attach your PowerPoint presentation to PRISM Online at least 3 days before the scheduled review meeting.
- Present your project to the advisory committee. You will have up to 20 minutes to present your project.
- Committee members provide feedback and make suggestions about changes needed to improve your project and presentation.

RCO staff also will review your application for eligibility, completeness, and clarity, and return the application with questions or suggested changes.

Step 5: Re-Submit Application by Technical Completion Deadline July 15, 2016

- Address issues raised during technical review and make modifications, if needed.
- Complete all revisions and resubmit the application in PRISM Online by the technical completion deadline or your application will be deemed ineligible.

Step 6: Project Evaluation and Preliminary Ranked List – August 23-24, 2016

Your participation in the project evaluation meeting is mandatory for all projects considered for funding. All presentations are given in-person in Olympia.

- Prepare (or update from technical review) a PowerPoint presentation responding to the evaluation criteria found in Manual 10f. Respond to the criteria in order. Note that handouts or other materials will not be permitted.
- RCO will schedule time for you to make a presentation to the evaluation team.
- Attach your PowerPoint presentation and presentation notes to your application in PRISM Online at least 3 days before the scheduled evaluation.
- Present your project to the evaluation team. You will have up to 20 minutes to present your project.
- Evaluators may ask clarifying questions and will score your project using the board adopted evaluation criteria.

RCO staff tabulates the results and shares the preliminary ranked list with the advisory committee to validate the results, establish the committee's funding recommendation, and discuss any proposed process or policy changes. RCO then announces the results of the evaluation and posts the preliminary ranked lists on its [Web Site](#).

RCO staff present the preliminary ranked list to the Recreation and Conservation Funding Board for final approval and inclusion with the board's recommendation to the Governor and the Legislature.

Step 7: Applicants Submit Pre-Agreement Materials – May 1, 2017

- Provide a [Certification of Applicant Match](#) to show what amounts and sources of match you have in hand for the project. Attach this document to your application in PRISM Online.
- Provide any other requested pre-agreement materials as required by RCO.

Step 8: Board Awards Grants and RCO Issues Agreements – after July 1, 2017

- The board approves grant funding after the Legislature adopts a budget.
- RCO works with you to execute a project agreement before work begins.
- You review other [RCO policy manuals](#):
 - *Manual 7, Long-term Obligations*
 - *Manual 8, Reimbursements*
- You attend a Successful Applicant Webinar; then complete your project.
