**DATE:** November 2008

**SUBJECT:** September - November Activities of the Governor's Salmon Recovery Office

**Recovery plan implementation report** – GSRO's report on what actions are most important for state and federal agencies to help implement recovery plans should be available for distribution at this meeting.

**Northwest Power and Conservation Council Fish and Wildlife Program Amendments** – We have commented, in coordination with regional salmon recovery organizations, on proposed amendments to the Power and Conservation Council's Fish and Wildlife Program. Our main point is to encourage language that strengthens the Council's reliance on our state's recovery plans.

**State of Salmon Report** – We are nearing completion of this year's report. At last count, more than 120 people had provided data and/or photos during production.
